

BSSP-D-G

The BRITEK SafeHold® Damage and Ligature Resistant Pan is manufactured from a unique, robust solid surface material that provides a reliable, vandal resistant and softer aesthetic suited to institutional environments. It is highly suited to mental health facilities, prison custody cells, detention environments, care homes, public amenities, parks, stadiums, hospitality projects and hospitals. The front of wall installation incorporates a trap converter that is fully shrouded within the pan, with fixing points to both the wall and floor for ease of installation. The one-piece rimless bowl provides a ligature resistant, contraband-proof and secure solution for at-risk applications. Modern styling helps normalise the environment, supported by a fully rimless hygienic flush design with no internal ledges or steps, reducing staining and preventing water from sitting on surfaces where limescale can build. The polished solid-surface material ensures the unit remains easy to clean and hygienic. The raised comfort-height profile and extended projection ensure full compliance with AS1428.1.

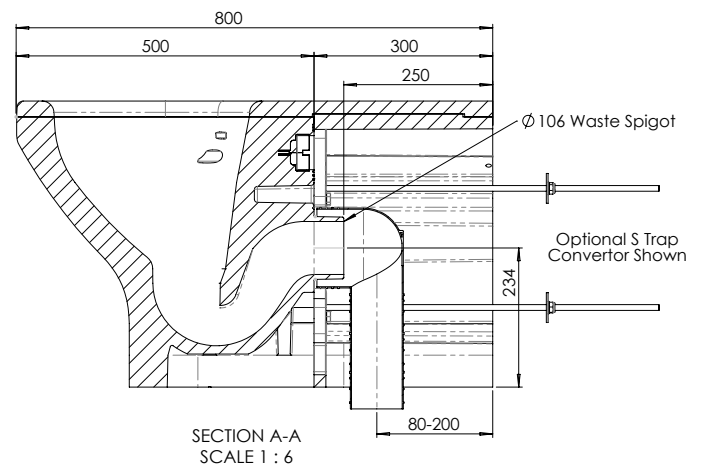

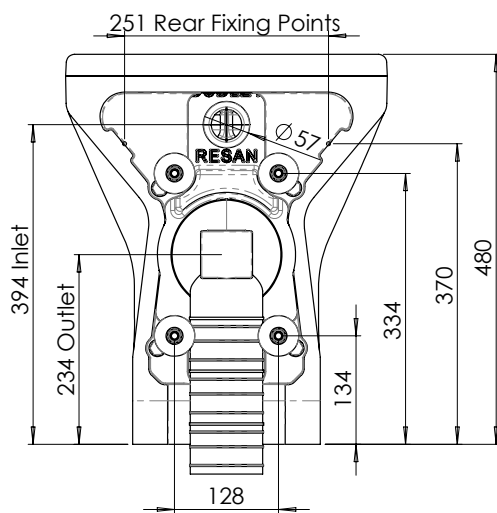

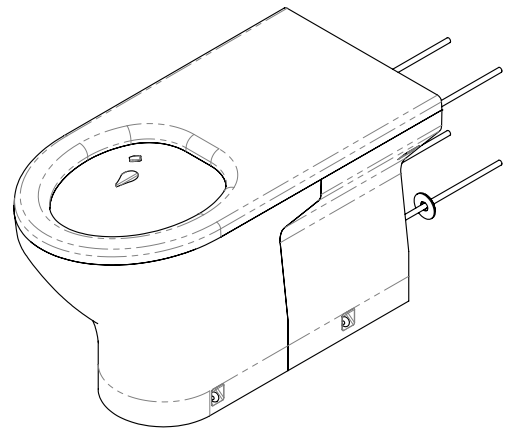

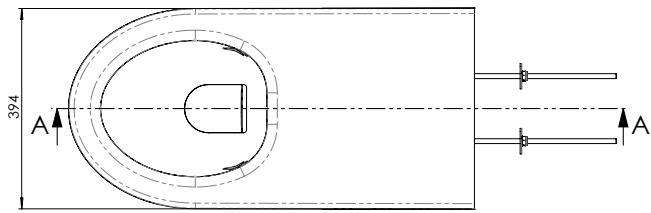

Features and Benefits

- Front of wall shrouded waste design and supplied with an S Trap convertor for ease of installation.
