

DRDC

The BRITEX Stainless Steel Recessed Drinking Cubicle is a space-saving, vandal-resistant hydration solution designed for schools, public amenities, stadiums and sporting clubs. Recessed into a wall cavity, it sits flush with the wall to prevent obstruction of public thoroughfares while providing easy access to drinking water. WaterMark certified and supplied with a heavy-duty push-button bubbler, the unit features concealed plumbing connections, rounded internal corners for easy cleaning and an optional bottle filler tap.

Features and Benefits

- **Space-Saving Recessed Design** – Installs flush within a wall cavity to maximise usable space and maintain clear walkways.
- **WaterMark Certified** – Ensures compliance with Australian plumbing standards for quality and performance.
- **Vandal-Resistant Construction** – Designed for demanding public environments with concealed connections and secure installation options.
- **Flexible Configuration Options** – Available in front-fixed or rear-fixed models, with an optional bottle filler tap to suit project requirements.
