

OSST

The BRITEX Settling Tank offers a practical and reliable solution for separating solids from liquids in environments where waste materials are frequently generated. Constructed from 1.2mm Grade 316 stainless steel, this tank is designed to withstand the rigors of demanding environments like art rooms, medical and dental facilities, and workshops. It effectively manages waste by allowing solid particles, including paint, plaster, clay, and dirt, to settle at the bottom of the tank, while clean water flows above, exiting through the outlet at the top.

Features and Benefits

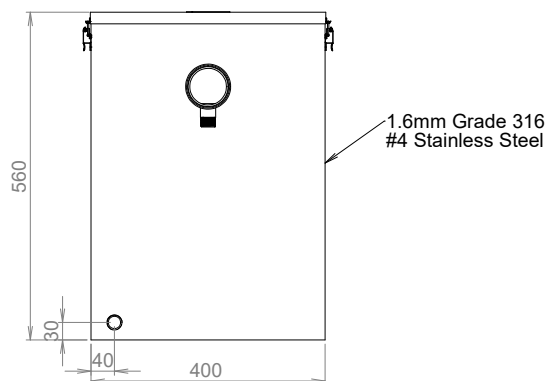

- Designed to keep solid waste out of plumbing systems
- Easy access and secure closure with quick-release clips
- Airtight lid sealed by internal gasket
- Corrosion-resistant grade 316 stainless steel
- 100 Litre Capacity Standard
- Tailored to meet the specific needs
- Installed Above Ground
- Outlet Pipe Fitted with Sampling Valve
- Commonly Used in Art Rooms, Workshops, and Medical/Dental Projects

Sample Spec

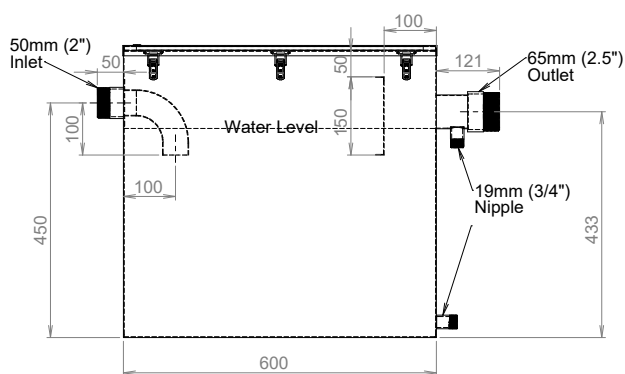

BRITEX grade 316 S.S. Settling Tank - 600L x 400W x 560H O/A. 100 Litre capacity. Outlet to incorporate sampling valve. Lid sealed with an internal rubber gasket and quick release clips - Product Code OSST
